ACKNOWLEDGEMENT

The success and final outcome of this project required a lot of guidance and assistance from many people and I am extremely fortunate to have got this all along the completion of my project work. Whatever I have done is only due to such guidance and assistance and I would not forget to thank them.

This project has been conducted as a part of 6th Semester of BCA which covers the idea of System Analysis and Designing. I take this opportunity to express my ideas.

I am extremely grateful of our Head of Department **Prof. C . P . Patel** for his Warmth and providing me an environment in collage only, which helped me to make this task feel easy.

I would also thanks and deep sense of gratitude to our guides **Minaz Shaikh** for imparting us valuable guidance in starting the preparation of this project. She helped me by solving many doubts and suggesting many references. I would also like to offer gratitude towards faculty of DDU Institute of Management and Computer Application, who helped us giving valuable suggestions and encouragement which not only helped us in preparing this project document but a better insight in this field.

Lastly, we express deep sense of gratitude towards our colleagues also those who directly or indirectly helped us while preparing this project document. For providing us the necessary information guidelines for our project without your support, this project would have been a distant dream

Thank You All,

Krunal Akbari
